Tool Operation

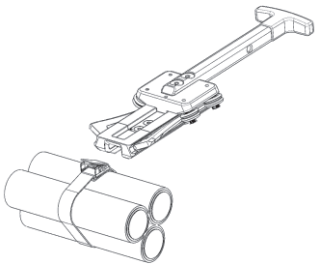

1. Wrap band around object to be clamped. Insert band through buckle once for single-wrap or twice for double-wrap.

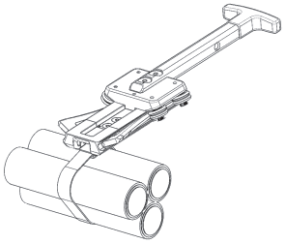

2. If desired, you may pre-form a clamp in the same fashion as step 2.

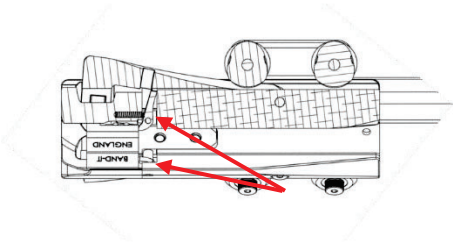

3. Position the tie on the object you are clamping. Pull the wrapped tie hand tight. Slightly bend the tail up to keep the clamp in place.

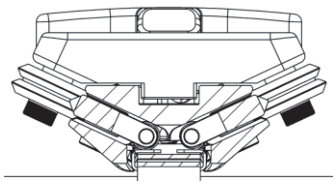

4. Insert buckle and folded tail into mouth of LokMate Clip Fastening Tool.

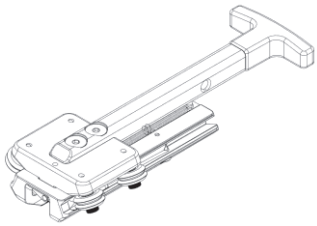

5. Ensure LokMate is fully forward on the buckle.

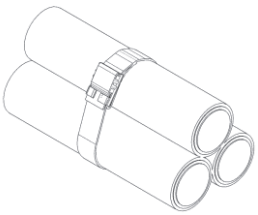

6. Safety levers will activate only when buckle is pressing against them – tool will not press forward without proper engagement.

6. Push tool forward to fold buckle ears.

8. Ensure tool is fully forward, should feel slight tactile ‘click’ when complete.

9. Release handle and pull backward from buckle.
