Question: Why do you offer the same kind of band in cardboard and Totes packaging?

Answer:
BAND-IT Totes are quickly becoming the industry standard. These handy, waterproof, plastic containers dispense BAND-IT stainless steel band, and the durable colored plastic specifies various band widths with ease. The see-through design eliminates the risk of running out of band at the jobsite. The Totes were designed to alleviate the inconveniences of standard cardboard packaging. They hold up when rain, heat, cold, or simple rough-handling occur.

Hints and Help:
BAND-IT offers industry standard Type 201 Stainless Steel banding in colored polymer base Totes to easily identify various lengths.

Advantages of Using BAND-IT Tote:

1)Simple to Order:

CARDBOARD BOXES	TOTE	DESCRIPTION
C20699	C206R9	19.05 mm band Tote Red
C20599	C205G9	15.875 mm band Tote Green
C20499	C204B9	12.7 mm band Tote Blue
C20399	C203Y9	9.525 mm band Tote Yellow

2) The various colors denote specific band widths for easy identification.

3) The see-through design eliminates the risk of running out of band at the job site. It's easy to see how much band is remaining in the Tote before ever leaving the shop.

4) It's easy to pull band from the Tote as well as return the extra. (Try this with cardboard boxes!)

We're confident you'll enjoy the labor savings and decreased scrap costs of using BAND-IT Totes. The next time you order 30.48 m Type 201 SS banding in cardboard cartons, order a couple of Totes also and ask your crew what they think. Using BAND-IT Totes is the easiest way to identify and use BAND-IT Stainless Steel Band.

Stainless Steel band in Totes is available with EASY SCALE. EASY SCALE is a patented imprint right on the band– eliminating costly waste and complicated measuring by allowing users to quickly and precisely roll out the exact length of band needed for any clamp.
