Question: Why should I use BAND-IT Junior® Smooth I.D. Clamps instead of Junior® Clamps?

Answer:

BAND-IT Junior Smooth ID hose clamps reduce the potential for leaky fitting connections. BAND-IT engineers developed this breakthrough technology through a continued effort to improve the Junior clamp. The "buckle nest" design of the Junior Smooth ID Clamp maintains a uniform, gap-free inside diameter that dramatically reduces leak problems.

BAND-IT manufactures 46 sizes of Junior Smooth I.D clamps from 20.6375 mm diameter up to 203.2 mm diameter. Five band widths are offered from 6.35 mm wide to 19.05 mm wide to provide various levels of clamping strength. Two grades of stainless steel, type 201SS for maximum strength and type 316SS for superior corrosion resistance, are offered. In addition, many Junior Smooth ID Clamp sizes are available in galvanized carbon steel band for economy. All BAND-IT Junior Smooth I.D. Clamps are constructed with a double wrap of band material which increases the holding power of clamped assemblies.

Hints and Help:

Larger quantity packs of most sizes of Junior Smooth ID Clamps are available for additional savings. Order these economy packs using the QS Series Junior Smooth I.D. part numbers. *For example: JS2119 quantity 50/box; QS2119 quantity 250/box*

•JS Series Part Numbers - Standard quantities depending on clamp size are:
- 25/box
- 50/box
- 100/box

•QS Series Part Numbers - Bulk quantities depending on clamp size are:
- 100/box
- 125/box
- 250/box
- 500/box

Junior clamps are also cataloged as Jr clamps. Both Junior® and BAND-IT Jr® are registered trademarks of BAND-IT-IDEX, Inc.

The same superior smooth I.D. clamp design is available in BAND-IT's strongest hose clamping system, Ultra-Lok. The Ultra-Lok clamp system offers portability and versatility to get the job done. Ultra-Lok is simply the best band clamping system available.
