BAND-IT JR® 201 SS Smooth I.D Inner Diameter Pre-Formed Clamps

BAND-IT JR® Smooth I.D Pre-Formed Clamps

As stiffer and thinner materials increasingly replace soft, spongy thick-walled rubber, BAND-IT® developed the Smooth ID JR® preformed clamp in both 201 and 316 steel, with a uniform gap-free inside diameter, that virtually eliminates leaks and has double wrapped steel bands for additional strength. With a Lip-lock design to be vibration resistant – no need for hammering or crimping. BAND-IT JR® Smooth I.D Pre-Formed Clamps can be applied with the C001 Tool and either the J001 or J050 Adapters depending on the size. For high speed & large volumes they can also be applied with the S750 Pneumatic Tool.

BAND-IT JR® 201 Stainless Steel Smooth Preformed ID Clamps

ULTRA-LOK® CLAMPS

Designed for quick installation, highest clamping force and gap-free inside diameter.
The best choice for demanding applications!

- Strongest band clamping system available
- Double wrapped 1/4 hard 201SS for superior strength
- Unique lock formed under full tension maximizes tightness
- Thicker buckle is 2-3 times stronger than other preformed clamps
- Smooth inside diameter designed to eliminate leak paths
- Buckle hood protects lock from snags
- Clamps can be applied either with the UL9010 Electric Tool or UL4000-D 18 Volt Rechargeable Tool.

BAND-IT ULTRA-LOK® 201 Stainless Steel ¼ Hard Clamping System

CENTRE PUNCH CLAMPS

Designed to meet your specific application requirement. Double wrapped with 201 Stainless steel or Galvanised Steel. Used in less demanding applications where minimizing leaks and longevity are not critical. Lock with impact from a hammer using a conical punch designed into the tool.

T300 Centre Punch Tool

BAND-IT® 201 Stainless Steel Bands

The BAND-IT® type 201 Stainless steel non-magnetic band is the preferred option in all general use banding applications, offering high tensile strength and good resistance to oxidation and weathering. Available in a variety of widths and thicknesses.

In addition, EASYSIZE – imprinted measurements on the band, help determine band length and eliminate costly waste. Packaged in a standard box or a durable plastic tote for easy dispensing.

------	---

BAND-IT® 201 Stainless Steel vs BAND-IT® 316 Stainless Steel

Selecting the correct steel will depend on the tensile strength or corrosion resistance specifications of your project.

Corrosion Resistance	201 Stainless Steel	316 Stainless Steel
Mild Atmospheric & Fresh water	Good	Excellent
Industrial Atmosphere	Good	Very Good
Marine Atmosphere	Fair	Very Good
Salt Water	No	Good
Mild Chemical	Fair	Good
Oxidizing Chemical	Fair	Good
Reducing Chemical	No	Good
Ultimate Tensile Strength	690 MPa	550 MPa

BAND-IT® Giant 201 Stainless Steel Band

BAND-IT® Giant Band is tough where tough counts.

Giant Band produces the strongest band clamp on the market. Giant Band can be formed into a single or double wrapped clamp configuration and offers the widest and thickest band to provide maximum strength. The 201 Stainless steel offers good resistance to oxidation and many moderate corrosive agents.

Ball-Lokt™ Cable Ties

For applications ranging from identification tagging to bundling cables, Ball-Lokt™ Ties in 316 stainless steel, provide a longer life than nylon ties, especially in extreme climates.

The epoxy coated ties are UV resistant and provide minimal cracking when exposed to lower temperatures or harsh conditions.

Self-locking design installation by hand or with the KS652 tool, to assure uniform tension and clean tail cut-off for safe handling.
